

A TOOL TO DETECT THE MOST COMMON AUTOANTIBODIES ASSOCIATED WITH YOUR NEUROLOGICAL NETWORK.

NEURAL ZOOMER

The Vibrant Advantage

The Neural Zoomer is a comprehensive tool available for neurological autoimmunity. It has the most relevant bio-markers based on current scientific literature.

Minimize false negatives

Screen for reactivity to more antigens than any other test available in the market.

Technology

Comprehensive antibody recognition using the microarray enables increased sensitivity and specificity.

Understand the source/triggers

The antibody test may help your physician identify the source of your symptoms and implement the most effective treatment plan possible.

Better results

Highly accurate and quantifiable test results are easily accessible through our web-based patient portal.

Get Tested Now...

Vibrant Neural Zoomer aims to reduce the prevalence of neurological conditions by empowering patients and physicians with a vital resource for early risk detection and enhanced focus on personalized primary prevention.

You may benefit from Neural Zoomer if you suffer from: ataxia, sensory loss, neuropathic pain, impaired vision, muscle pain/spasms, muscle weakness/atrophy, memory loss and autoimmune disease.

5-10% of the general population suffer from an autoimmune disorder.

Fast 7-day turnaround time.

Access to a highly qualified team of expert dietitians to offer guidance for you and your physician/dietitian for better health outcomes.

San Carlos, CA 94070

The general wellness test intended uses relate to sustaining or offering general improvement to functions associated with a general state of health while making reference to diseases or conditions. This test has been laboratory developed and its performance characteristics determined by Vibrant America LLC, a CLIA and CAP certified laboratory performing the test. The test has not been cleared or approved by the U.S. Food and Drug Administration (FDA). Although FDA does not currently clear or approve laboratory-developed tests in the U.S., certification of the laboratory is required under CLIA to ensure the quality and validity of the tests.

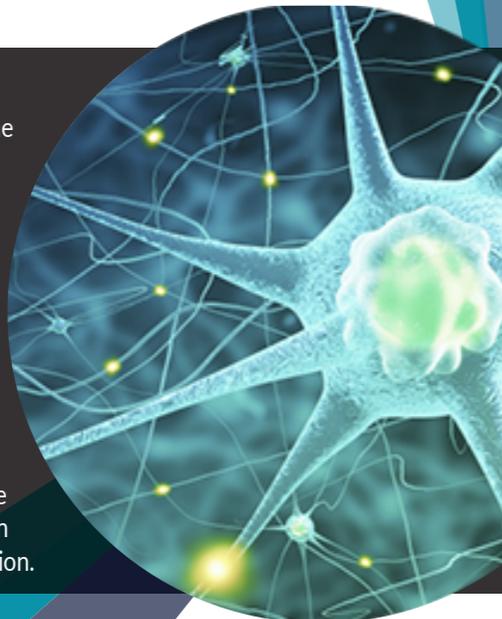

What Is Neural Zoomer?

Neural Zoomer is an array of neurological proteins which offers very specific antibody-to-antigen recognition. Neural Zoomer is designed to assess an individual's reactivity to neurological antigens.

The Neural Zoomer has optional additional genetic testing for the ApoE genotype, which has been shown to influence risk of certain neurological conditions. There are 3 different versions (alleles) of the ApoE gene: 2, 3, and 4. You inherit one copy from each of your parents, therefore can have any combination of two of those alleles.

The intended use of Neural Zoomer is to motivate the user to improve lifestyle choices to enhance health outcomes. For chronic diseases or conditions associated with the nervous system, it is well understood that proper lifestyle choices may help improve quality of life and reduce symptom risk.

Autoimmunity is a key component in several diseases of the nervous system. For reasons still under research, the body attacks itself and causes injury along with other components of the immune system, like cytokines, leading to disease. Neural specific autoantibodies have been documented and their utility validated in several studies. The Neural Zoomer is the most comprehensive compilation of these studies, enabling early risk detection and prevention of neural degeneration.

What Is Tested?

A comprehensive set of autoimmunity markers, from a single serum draw, to provide you with your neurological risks:

Demyelination Antigens

Anti Tubulin IgM/IgG+IgA

Anti Myelin basic protein IgM/IgG+IgA

Blood brain barrier disruption

Anti s100b IgM/IgG+IgA

Optical and Autonomic Nervous System Disorder

Anti Neuron specific enolase IgM/IgG+IgA

Peripheral Neuropathy

Anti GM1 IgM/IgG+IgA

Anti GM2 IgM/IgG+IgA

Brain Autoimmunity

Anti HSV1 IgM/IgG+IgA

Anti Cerebellum IgM/IgG+IgA

Anti Purkinje cell IgM/IgG+IgA

Neural Genetics (available upon request)

Apolipoprotein E

Why Use Neural Zoomer?

Neural Zoomer aims to reduce the prevalence of neurological conditions by empowering patients and physicians with a vital resource for early risk detection and an enhanced focus on personalized primary prevention. Autoimmune disorders affect 5-10% of the general population, and often involve the central and peripheral nervous systems. Symptoms associated with autoimmunity in the nervous system include:

- Ataxia
- Sensory loss
- Neuropathic Pain
- Impaired vision
- Photosensitivity
- Muscle pain/spasms
- Muscle weakness/atrophy
- Orthostatic hypotension
- Chronic pain/Fibromyalgia
- Memory loss or Brain Fog
- Autoimmune disease

If you suffer from any of the above issues, you may benefit from the **Vibrant Neural Zoomer**.
